

User Safety Checks & Policies

Prior to use of any Aerial Apparatus you must complete Safety Checklist. Please read below detailed explanation of how to complete Safety Check for each Apparatus. This is mandatory for usage. If an Apparatus fails Safety Check do not use it.

Aerial Silks

Each Silk is denoted in Safety Binder by Colour. Find appropriate Silk in Safety Binder and Complete Checklist.

1. Ensure weekly checks are completed.
2. Check fabric for any flaws, rips, tears, runs.
3. Spin Apparatus multiple times in all directions to ensure the swivel moves smoothly.
4. From the ground look up to check the carabiner. Ensure it is closed - Flag should face down.

*If there is any abnormality report to Forum Staff and mark as Out of Service. Do not use it.

Aerial Hoop

Each Hoop is denoted in Safety binder by a number tagged on Carabiner. Find appropriate Hoop in Safety Binder and Complete Checklist.

1. Ensure weekly checks are completed.
2. Check hoop for any visible flaws.
3. Spin apparatus multiple times in all directions to ensure the swivel moves smoothly.
4. From ground look up to check carabiner. Ensure it is closed - Flag should face down.

*If there is any abnormality report to Forum Staff and mark as Out of Service. Do not use.

Trapeze

Find Trapeze in Safety Binder and Complete Checklist.

1. Ensure weekly checks are completed.
2. Check trapeze for any visible flaws. Ensure dressing is not coming apart in any location.
3. From the ground look up to check the carabiner. Ensure it is closed - Flag should face down.

*If there is any abnormality report to Forum Staff and mark as Out of Service. Do not use it.

Rope

Each Rope is denoted in Safety binder by a number tagged on Carabiner. Find appropriate Rope in Safety Binder and Complete Checklist.

1. Ensure weekly check was completed
2. Check rope for any visible flaws.
3. Pull and rotate rope multiple times in all directions to ensure the anchor moves smoothly.
4. From the ground look up to check carabiner. Ensure it is closed - Flag should face down.

*If there is any abnormality report to Forum Staff and mark as Out of Service. Do not use it.

Rings

Find Rings in Safety Binder and Complete Checklist.

1. Ensure weekly check was completed
2. Check wooden rings for any visible flaws, cracks and fractures.
3. Check straps for any visible flaws, snags, rips and tears.
4. Check ratchet to ensure it is closed. Pull hard once the visual check is completed.

*If there is any abnormality report to Forum Staff and mark as Out of Service. Do not use it.

Pole

Each Pole is denoted by a number. Find the number at the top of the pole. Find appropriate Pole to Complete Checklist.

1. Ensure weekly check was completed
2. Complete Visual Check of Pole for any damage, cracks and fractures.
3. Grip Pole and pull sharply. Pole should not move.
4. If Pole does not move carefully, complete a spin with at least one foot on the ground.

*If there is any abnormality or Pole moves report to Forum Staff or ask for assistance to tighten. If assistance is not available, mark as Out of Service and do not use it.
